Me@MorganCaviness.com

I am a 24-year-old self-taught digital artist and video game developer. I have nearly 10 years of digital design experience with a focus on graphic design. I enjoy finding creative solutions to complex design problems that engage audiences and communicate ideas.

My background in solo video game development gives my graphic design work a technical edge, and has allowed me to grow and maintain a well rounded skill set. I specialize in graphic design, digital communication, and interactive media, with a focus on creative visual problem solving.

Featured Work

[Digital Bazooka]

Type: Logo | Animation

Year: 2025

Description: Designed a clean vector logo and built a custom animated intro sequence for the Digital Bazooka podcast. Edited and mixed the accompanying audio, layering sound design cues to sync seamlessly with the visuals. Rendered and formatted the final video and audio assets to deliver a polished, platform-ready show opener for digital platforms.

[Cully Bubble]

Type: Video Game

Year: 2026

Description: An original children's pixel-art mobile game designed for non-overstimulating play. Responsible for the entire design and release pipeline—from visual asset creation, UI/UX architecture, animation, and coding to engine implementation, beta testing, and Google Play Store deployment.

[E-Typewriter]

Type: Software | Hardware

Year: 2025

Description: Designed and built a standalone electronic typewriter that bridges digital writing functionality with custom hardware design. The development process centered on 3D CAD modeling, iterative 3D-printing, and component integration—housing a 7-inch display and Raspberry Pi microcomputer in a custom-3D-printed enclosure designed to sit alongside a external keyboard. By combining parametric CAD design with rapid prototyping, the project yielded a distraction-free, single-purpose writing terminal tailored for immediate focus and functional ergonomics.

Skill Set

• Graphic Design

(Adobe Suite | Affinity)

• Typography

(InDesign)

• 3D-Modeling

(Blender)

• Video Editing

(DaVinci Resolve)

• Live Stream &

Video-Production

(OBS Studio)

• Video Game

Development

(Unreal Engine 5)

Work History

Fresco's Cocina Mexicana

Expediter | Cashier | Host | Server

June 2018–Aug 2022

Alpine Shooting Range

Range Officer

September 2020–July 2021

Torchy's Tacos

Expediter | Cashier

September 2021–September 2022

Gumby's Pizza

Delivery Driver

May 2023–April 2025

Hopdoddy

Fry Cook

April 2025–July 2026

Volunteer Work

San Marcos Seventh-day Adventist Church

February–July 2026

- Directed and operated weekly live stream broadcasts using OBS Studio, seamlessly managing camera operation, graphics overlays, and scene transitions in real time.
- Monitored and balanced multi-channel audio feeds while maintaining active camera operation, ensuring consistent sound quality and clean frame compositions.
- Delivered reliable live broadcasts to remote church members week-to-week, troubleshooting live technical issues under real-time production constraints.
